La Escandella
ROOFING THE WORLD

TRADITION AND AVANT-GARDE
IN SEARCH OF A COMMON GOAL:
PERFECTION.

CERAMIC TRADITION

For many centuries, ancient civilizations have settled in the lands surrounding the Mediterranean Sea, creating solidly-built houses in harmony with their surroundings. With careful finishings, and crowned with beautiful and resistant tiled roofs, these formed sheltered, warm and enchanting homes.

La Escandella born into this tradition, was founded more than 40 years ago when Noé and Juan Román Brotons started the first factory of clay paving stones.

Today **La Escandella** Group, comprised of Román Brotons and Cerámica La Escandella, produces the largest portfolio of high-quality, proven and tested, roof tiles on the market.

LA ESCANDELLA
FACTORY IS
THE LARGEST
ON-SITE
PRODUCTION
CAPACITY
WORLDWIDE,
WITH 55.000 M²
MANUFACTURING
FACILITY.

La Escandella

ROOFING THE WORLD

LA ESCANDELLA

These values are embodied in its production plant for clay roof tiles – one of the largest in the world. Its carefully designed roof tiles blend into any geographic location, bringing their own touch of distinction, elegance, aesthetic harmony and beauty.

The culmination of this effort and an obsession for perfection at **La Escandella** have helped us develop a system through the use of H supports and a high-temperature cooking process of individual pieces that manage to eliminate the creases and contact points of the flattest tiles, achieving a finer texture and perfect finishes. The H-Selection line was born this way.

CONTINUOUS GROWTH

In its effort to improve, **La Escandella** has achieved an astonishing growth rate, making its projects praised and recognized internationally. Its success is based on effort and innovation, which has positioned the company as one of the leading business groups in R&D&I of the sector.

Over the last ten years, **La Escandella** has consolidated its position as market leader in Spain and one of the main manufacturers in the European arena, on the strength of R&D&I investments and new product developments that reflect the requirements, habitat and architectural style of each market it is present in.

At **La Escandella** the future is made today.

PRODUCTION CAPACITY, TECHNOLOGY AND INNOVATION

Located next to the Mediterranean Sea, **La Escandella**'s plant offers the largest on-site production capacity worldwide. Our 55.000 m2 manufacturing facility ensures that the company can react immediately to any need, anywhere in the world.

La Escandella has made a point of always incorporating the latest technological innovations into its chain of production. Its installations are the most advanced on the market and its manufacturing processes are totally automated, the key to establishing its position as one of the largest producers in the world.

COMMITMENT TO THE ENVIRONMENT

SUSTAINABLE ENVIRONMENT IS OUR COMMITMENT

The maintenance and protection of the environment is a constant commitment to **La Escandella**; these values are reflected in a co-generation plant that allows us to rationalize the use of energy, which in turn is also environmentally friendly.

By using lead-free ceramic mixtures, **La Escandella** gets its engobes to imitate nature, thereby showing a totally natural aging.

IMPROVEMENT OF OUR WATER MANAGEMENT: ZERO DUMPING OF INDUSTRIAL WASTE

All the wastewater discharged in the industrial productive processes is recovered and treated through a sedimentation reservoir (sewage sludge).

CONTROL OF AIR EMISSIONS

La Escandella monitors and evaluates the CO₂ emitted into the atmosphere, as per the Kyoto protocol rules. The company also conducts periodic checks of diffuse, channelized and noise emissions in compliance with the parameters of our IEA (Integrated Environmental Authorization).

Thanks to all this, we manage to produce high quality roof tiles in the line of the best architectural tradition while implementing cutting-edge technologies and having the strictest respect for the environment.

A NATURAL AND SUSTAINABLE PRODUCT

Clay roof Tiles are a sustainable and energy-efficient choice for any construction project. That is why, at **La Escandella** we keep our commitment to the environment and the ecosystem by manufacturing products with raw materials that come from Mother Earth.

Unsurpassed durability. Unlike other materials, our clay roof tiles at **La Escandella** have a long life of over 100 years. They are natural products that do not require maintenance; therefore the use of chemical cleaners needed by other roofing products is not necessary.

La Escandella clay roof tiles are 100% recyclable. The tiles that cannot be sold due to deficiencies in any part of the process are crushed and used in small percentages in the manufacturing of new tiles, which entails the recycling and reuse of products and makes the process totally organic.

AT LA ESCANDELLA
WE CARE FOR THE
ENVIROMENT

WE SUBMIT EACH ITEM TO
RIGOROUS AND A DAILY
QUALITY CONTROL CHECKS

UNPARALLELED QUALITY

La Escandella
ROOFING THE WORLD

UNPARALLELED QUALITY

During the production process we submit each item to rigorous and daily quality control checks. This ensures that **La Escandella's** roof tiles comply with all strict national and international standards, and are guaranteed to carry out the purpose of its intended use.

La Escandella tiles have achieved the highest indexes in the values demanded by international standards for the quality control of fired clay roof tiles. Our international approvals include **European Standard** for Clay roof tiles **EN-1304**, and also **French Certification AFNOR**; **Australia's**

(sea salt/coastal protection); **United States ICC-ES** (ASTM C-1167 Grade 1), **Miami-Dade's NOA**.....

Nowadays, **La Escandella** provides two types of guarantee that are defined by the product line and its manufacturing process:

- **35 years warranty** to traditional tiles: Large Mixed, Small Mixed, Curved and Flat.
- **100 years warranty** to H-Selection tiles: Planum, Visum3, Innova and Vienna.

The Palm Island (Dubai-EAU)

Sofitel Resort (Dubai)

LA ESCANDELLA WORLDWIDE

La Escandella is present in over 70 countries spread over all continents. We are an entrepreneurial company that offers true quality, as our track record and international projects testify.

Today, **La Escandella** tile Works are featured in the most important and emblematic building projects worldwide that require high-quality roof tiles – the crown jewel of any building. Among these, we would highlight the Europa Park (Germany), The Palm Island (Dubai, UAE) and Terra Mítica in Spain.

H-SELECTION

PERFECTION
IS TO REACH
THE TOP...
AND WE HAVE
ACCOMPLISHED

The obsession to create the ideal roof tile has always been present in the philosophy of **La Escandella**. As a result the H-Selection product line is born. Based on a cooking system with refractory H-shaped cassettes that help isolate each tile individually, without creases or contact points, this product line achieves an unprecedented level of finish for ceramic roofing solutions.

H-Selection is a Premium range within the extensive catalog of **La Escandella**, intended to satisfy our most demanding customers and their most exclusive projects. The finish, absorption, flatness, colors, shapes and finer textures of our products are their hallmarks.

At **La Escandella**
perfection is a goal.

SELECTION
La Escandella

INNOVATION IN SUPPORT OF A NEW PRODUCTION PROCESS ALLOWS US TO CREATE PERFECT PIECES

WHAT IS H-SELECTION?

Sometimes the difference between high quality and perfection is measured by small details. And correcting small details requires great ideas, such as La Escandella's innovative manufacturing H-system, which ensures each piece is cooked individually, without contact points or creases, and results in a unique, one-of-a-kind piece, with a finer texture and perfect finish.

The roofs of the most exclusive buildings deserve a product that suits them.

In an effort to apply the most innovative technological advances, we have invested heavily in our production process in pursuit of a unique finish and to create a Premium line for our most demanding customers. For those who think that perfection is in the details, we have created H-Selection.

Excellent flatness

Individual curing of each tile thanks to support in H. Excellent flatness with no contact points.

High definition on each piece

It provides a perfect definition on each piece, made with gypsum moulds, providing a much finer texture.

Low absorption

Higher resistance to ice and mould formation.

Lifetime warranty

Our 100 years of warranty ensure your peace of mind and demonstrate the quality of our manufacturing process.

VISUM3

EXCLUSIVITY AND DESIGN IN ONE PIECE
CREATING THE VISUAL EFFECT OF THREE.
COLOR VARIETY
AND PERFECT FINISHES

THREE IN ONE

Visum3, an exclusive roof tile, patented worldwide, which thanks to its unique design, creates in one piece the visual effect of three. A revolutionary concept that, once it is installed, gets the aesthetics and elegance of a traditional flat roof. A perfect finish ensures a complete roofing system, which —supplemented by a wide range of accessories— meets the needs of any project. Not only is it an exclusive tile, it is a revolutionary roofing system.

UNIQUE AND EXCLUSIVE DESIGN

Despite being a single piece, Visum3, offers a variety of tones for the apparent triple tile, in a way that all of them are different from each other which helps creating impressive color creations. Its rich finish gives a dramatic and elegant look to the roof.

SPEED AND ECONOMY

With Visum3, installation costs are dramatically reduced, since only 11.5 tiles/sq. meter are required, getting the appearance of a small tile with the assembling speed of a large piece. A flexible tile, visually striking and which noticeably reduces installation costs.

A product awarded the "Alfa de Plata" award for the technological and aesthetic advances applied; a prize awarded by the Spanish Society of Ceramics and Glass (Sociedad Española de Cerámica y Vidrio).

PLANUM

TRADITIONAL ELEGANCE WITH A
CUTTING-EDGE DESIGN.
OUR MOST REQUESTED TILE DUE TO ITS
SIZE, STRENGTH AND LIGHTNESS

EFFECTIVENESS OF FORMS

Tradition made modern. The PLANUM roof tile combines traditional materials with the most innovative projects. Stylish and versatile, it has become a favorite of architects for its size, strength and lightness.

Always considering the installation and cost reduction, its design and size provide aesthetic and functional solutions hard to find with other tiles. All this, combined with an attractive color palette, makes the PLANUM roof tile one of the most requested tiles by professionals.

PERFECT PERFORMANCE

Subject to the strictest aesthetic and functional parameters, its size brings many advantages both in design and installation. Its lightness and variable pitch involve in-situ benefits that are hard to beat.

Its interlocking system ensures excellent water tightness, and its drainage system on the left side helps drain the rain water away from the assembled joints, thus achieving an impressive safety and tightness.

SELECTION

La Escandella

VIENNA

PURE LINES AND COLORS THAT
GIVE PERSONALITY TO THE MOST
INNOVATIVE PROJECTS

AESTHETIC MINIMALISM

In design there is a golden rule that says "less is more". Based on this principle, with the VIENNA roof tile we managed to give our pieces a unique personality for the most cutting-edge projects. Thanks to its flatness and an elegant color palette, we have achieved a tile that combines strength, elegance, simplicity and harmony. For those projects where modernity and avant-garde are an added value, the VIENNA's large central groove provides character and homogeneity.

PERFECTION IN FINISHING

Its greater resistance to frost and mildew, thanks to the high-temperature cooking process of individual pieces, makes the VIENNA roof tile a product geographically adaptable to any environment. Its manufacturing method in isolated plaster molds allows finer textures, without creases or juncture points, thus getting a more stylish finish.

GREAT FLATNESS

Aware that a perfect tile requires a perfect installation at **La Escandella**, we have designed a broad 80-mm longitudinal overlap (the largest in the market) and a double interlocking that avoids the breakage of parts, thus ensuring the water tightness of the roof. With a wide area of 11.5 units/sq. meter and a 6-unit packaging, we are able to achieve a considerable reduction in installation costs. The perfect flatness turns each piece into a work of art.

INNOVA

PERFECTION AT THE FOREFRONT OF DESIGN

STRENGTH, FLEXIBILITY AND LIGHTNESS

The INNOVA roof tile is a product that, due to the composition of the clay and its pressing process, allows superior strength and flexibility, while keeping a very light weight. A highly resistant tile, adaptable to any environment, a tile that facilitates creations and amazing colors on rooftops.

Our revolutionary plaster molds provide a perfect finish, a softer texture, with no contact points or creases. All of which, together with its top quality clay baked at high temperatures, produces less than 5% absorption. This results in greater resistance to frost and mildew. The side and overhead double interlocking achieves excellent sealing ensuring tightness.

LAYING VERSATILITY

At **La Escandella**, we are aware that the best product without a good assembly is useless. Therefore our obsession also extends to the installation of our parts. Because of their customizable interlocking, our INNOVA tiles can be mounted in a straight pattern or in a cross pattern, depending on the requirements of each project. This increases the installation options and creates perspectives that would be impossible for other tiles.

With an 80-mm longitudinal set (the largest in the market), and a 11.5 unit/sq. meter format, tile trimming is avoided thus reducing installation time and costs.

INNOVA

MEDITERRANEAN TILES

CLASSICISM AND AVANT-GARDE
JOIN IN A NEW CONCEPT OF
TRADITIONAL LA ESCANDELLA
TILES. THE COLORS OF THE
MEDITERRANEAN SEA MERGE
WITH THE CURVES OF HISTORY.

TRADITION AND FRESHNESS

In the extensive catalog of **La Escandella**, we pay special attention to the symbiosis between tradition and modernity. That is why the classicism of the curved tiles is always present in our collections. Roofing tiles that recall the golden age of the Italian Renaissance, the exoticism of Arab reminiscences, the flavor of the Spanish Mediterranean, or the charm of the Greek coast.

CHROMATICISM AND VERSATILITY

The wide color range, inspired by the most diverse cultures and a variety of finishes, makes a product line characterized by its durability. Designs in different sizes to suit any project, always bringing a touch of elegance which blends the old flavor with modernity.

MIXED

A ROOFTOP THAT INTEGRATES TO ANY ENVIRONMENT WITH THE SHAPES AND TEXTURES OF THE ARAB TILES.

MIXED DOUBLE CURVE TILE

Inspired by the beauty of the Arab roofs, this tile combines pan and cover while playing with design and functionality, allowing for a quick and easy laying on any project.

A large number of finishes allow new works to be integrated into historic environments blending with the landscape to perfection, thanks to their artificially-aged engobes.

AVAILABLE IN TWO SIZES

Made in two formats and with a large number of ceramic accessories that perfectly complement the roof, it makes time be in its favor because its durability is guaranteed in any type of facility works.

CURVED

RENEWED CLASSICISM.
THIS TIMELESS TILE
FOR ANY PERIOD AND STYLE

A TIMELESS PIECE

From ancient Greece to the present day, the curved tile has been the most widely used roofing tile throughout the Mediterranean. It is still being used today in new-house building for its beauty, simplicity and charm. A must in restoration and rehabilitation projects where time is an added value.

AVAILABLE IN FIVE DIFFERENT SIZES

In five sizes and a large number of finishes, both in white and red clay, these tiles ensure a wide range of possibilities in projects seeking the taste for tradition without losing reliability, and adapting to the most diverse historic environments.

FLAT

VERSATILITY AND SIMPLICITY, SUITABLE FOR ANY PROJECT

A MOSAIC OF ROOF TILES

A durable, sturdy, reliable and elegant tile. With a flat composition and curvatures on the surface, it can be adapted to all types of projects seeking the reliability of a durable tile with an elegant taste for the classic.

VERSATILE AND SIMPLE ROOF TILE TO INSTALL

The flat roof tile can be installed both in straight or broken bond. Being large tiles, materials and installation costs are significantly reduced, allowing quicker jobs with lasting and elegant results.

GLAZED ROOF TILES

LONG LIFETIME,
PROTECTION AND
BRIGHTNESS. THIS FINISH,
AVAILABLE FOR ALL THE
TILE FORMATS, HAS A
LOW MAINTENANCE AND
A BEAUTIFUL RANGE OF
COLORS

AN ANCIENT TRADITION

The glazed process allows to give new advantages to the products. The texture of the glazed tile is even smoother and the color is long lasting as its glazed surface protects it from moisture and future propagation of fungi and blackening. This process decorates the tile but also decreases the ventilation property as the surface layer of polish prevents the entry and exit of water. So from La Escandella we recommend to take care of

the ventilation of the roof and the low tile and especially with glazed tiles. In La Escandella, plumb-free polishes are applied to respect the environment.

EXCLUSIVE CROMATIC RANGE

In La Escandella we have the possibility to glaze any tile of our offer in a multitude of colors. The most standard colors are indicated in this catalog but according to your projects you can check for the application of any other color. On

mixed tiles we can offer commonly applied colors such as blues, greens, cognac for example but also apply a clear glazed over an aged color such as Hispania, Galia or Castell; this means time does not affect to your roof so the color you have chosen is the same during the whole life of your roof. Over the H-Selection tiles we can also offer you many ad hoc glazed colors with very competitive prices due to a new production system as the cooking in unit holder H-cassette.

ROOF **ACCESSORIES**

BECAUSE WE KNOW THAT
PERFECTION IS MEASURED
BY SMALL DETAILS, WE HAVE
A LINE OF PIECES TO MEET
ALL THE NEEDS NO MATTER
HOW COMPLICATED THE
PROJECT IS

SPECIAL PIECES. THE TOP OF A PERFECT ROOF

At **La Escandella** we know that a perfect roof is much more than tiles, so we have a wide range of special pieces to make each project unique. Eaves, facings, ridges, chimneys... All are essential parts of a quality finish to ensure duration, water tightness and elegance.

Because we know that perfection is measured by small details, we have a line of pieces to cover all the needs no matter how complicated the project is. Unique pieces, designed for top roof coverings with the level of finish and quality that our customers require.

Experience has shown us that a perfect roof requires perfect performance, and therefore we also offer a wide range of components to make your

rooftop a durable and reliable work of quality. Waterproofing membranes, bird- stoppers, ridge hooks, battens... All the necessary materials to facilitate the on-site installation of a unique roof.

**Providing solutions
to your problems.**

Colours: Red, beige, brown, black.

CAM09 / CAMF9
Alu-Roll Membrane

Width: Several sizes
Colours: Red, brown, black.

CAM05 / CAM010 / CAM51
Batten Brackets

Width: 40/50 mm // 1.57" / 1.97"
Material: Galvanized steel.

VENTILATION SYSTEMS FOR THE VALLEYS

CAM18
Alu-Valley Tape

Colours: Red, brown, black.

CAM37
Sealing Wedge

Colours: Red.

CM0500 / CM0501 / CM0502
Repairer paint pot

Colours: Galaxy Stone, Brown.

WATERPROOFING

ALU-ROLL WITH MICRO CUT

CAM01 / CAMF1

Rolls: 5 meters.

Dimensions: 30 cm / 40 cm width.

Colors: Red, Brown, Black, Paja.

Versatile aluminium mesh to be used under the ridges, designed to allow the air flow, and to protect against the entry of birds and rodents.

High UV and aging resistance.

Always apply on clean and dry surfaces.

ALU-ROLL MEMBRANE

CAM09 / CAMF9 / CAMF950

Rolls: 5 m. / 5 m. / 50 m.

Dimensions: 31 / 39 / 39 cm width.

Colors: Red, Brown, Black.

Side aluminium strips with internal covering of an adhesive band, connected to a polypropylene open air mesh.

Waterproof, each side ensuring a free passage of 145 cm².

High UV and aging resistance.

Always apply on clean and dry surfaces.

FLEX ALU

CAM08 / CAMF8

Rolls: 5 meters.

Dimensions: 30 cm / 40 cm width.

Colors: Red, Brown, Black, Paja.

Pleated band to ensure maximum adaptability and flexibility when applying. Flex-Alu is ideal for the waterproofing and sealing of joints on the roof: garrets, chimneys, walls, skylights, windows, ...

High UV and aging resistance.

Always apply on clean and dry surfaces.

ALUMINIUM WATER MEMBRANE

CAM36

Dimensions: 8 cm width x 2 meters large.

Colors: Red, Brown, Black.

Prelacquered sheet in 3 different Colors to be used for side finishing of the Flex-Alu bands for vertical joints and chimneys.

ALU SHEET FOR DRAINAGE OF GUTTERS

CAM13

Rolls: 5 meters.

Dimensions: 23 cm width.

Colors: Red.

Versatile aluminium foil to be used on the eaves of the roof, to ensure a correct waterproofing in the eaves region and drainage towards the gutter.

High UV and aging resistance.

Always apply on clean and dry surfaces.

MICRO-PERFORATED VALLEY TAPE

CAM18

Rolls: 5 meters.

Dimensions: 50 cm width.

Colors: Red, Brown, Black.

Aluminium foil used on the valleys for collecting water from the pitch, ensuring a correct waterproofing.

High UV and aging resistance.

Always apply on clean and dry surfaces.

UNDER RIDGE KIT WITH BATTEN SUPPORTS

CAM50

Dimensions: 1meter long (Side-strips: 14cms each)

Colors: Red.

Rigid under-ridge sheet with galvanized steel dome and aluminium strips. It is lightweight and can be adapted to any type of ridge.

The air outlet (100 cm²/m each side) ensures a perfect ventilation of the roof. The ridge sheet and 2 batten supports are included.

SEALING WEDGE

CAM37

Dimensions: 60mm width x 1m long.

Colors: Red.

PAINT POTS

CM0500 / CM0501 / CM0502

Capacity: 750ml. Pot

Colors: Galaxy, Slate, Brown.

Special paint for tiles, used in the assembly of dark colored roofs, to increase the beauty of the red clay texture that are visible when cutting pieces during the installation of the valleys or other meeting points.

VENTILATION

EAVES VENTILATION COMB SHIELD

CAM16 Mixed roof tile.
Dimensions: 11 cm x 1 lm.
Colors: Red, Black, Brown.
CAM14 Flat roof tiles.
Dimensions: 6 cm x 1 lm.
Colors: Red, Black.

The bird stopper comb protects the under tile area from birds and rodents. It is installed with nails or screws directly on the first batten, the tile being overlapped. It allows the air flow in the eaves region.

EAVES VENTILATION COMB WITH BATTEN

CAM58 Flat roof tiles.
Dimensions: 6 cm x 1 lm.
Colors: Red, Black.

METAL BIRD SPIKES

CAM38
Dimensions: 1 lm.

EAVE GRATING

CAM34
Dimensions: 15 cm width, 5 mt. roll.
Colors: Red.
CAM33
Dimensions: 10 cm width, 5/60 mt. roll.
Colors: Red, Black.

It protects the open ventilation area in the eaves against the entry of birds and rodents. The holes allow the air flow to ensure a proper ventilation.

WATERPROOF MEMBRANES

WATERPROOF MEMBRANE

CAM65 / CAM21 / CAM52 / CAM53

Dimensions: 1.5 mt width, 50 mt roll.

Weight: 115 grs/m² / 135 grs/m² / 150 grs/m² / 180 grs/m².

Waterproof membrane with a high transpiration capacity and 3 overlapped and thermosealed layers. The weight is of 135 grs/m², 150 grs/m² and 180 grs/m² and allowing a high permeability to steam, while it is waterproof and protects against wind.

ADHESIVE TAPE FOR WATERPROOF MEMBRANE

CAM31: 1 side tape

Dimensions: 5 cm width, 20 mt roll.

Colors: Yellow.

CAM39: 2 sides tape

Dimensions: 4 cm width, 50 mt roll.

Colors: Yellow.

Polyethylene adhesive tape with reinforcing mesh covered with high resistance acrylic adhesive. Designed for bonding waterproof membranes in its overlapped area preventing the air and wind flow through the different layers.

NAGEL UNDER TILE DRILLING

CAM32

Dimensions: 4 cm width, 30 mt roll.

Colors: Black.

Adhesive tape used between batten supports and waterproof membrane to prevent leakage where battens are nailed.

CONDENSATION BARRIER MEMBRANE

CAM55 / CAM56

Weight: 135 grs/m² / 150 grs/m².

Condensation barrier membrane with three overlapped and thermosealed layers. The weight is of 135 grs/m² or 150 grs/m².

FIXATION

RIDGE BATTEN SUPPORTS

ADJUSTABLE RIDGE BATTEN V BRACKET

CAM010

Aluminium ridge supports for battens to be adapted to any rigid surface. Install with screws and nails, leaving 80 cm between fixation elements.

Dimensions:

For batten supports ≤ 4 cm width

Colors: Stainless steel

RIDGE BATTEN BRACKET WITH KNOCK IN SCREW

CAM05

Screwable batten support is directly installed on the wooden beam in the ridge to the height required, leaving 80 cm between each one.

Dimensions:

For batten supports ≤ 5 cm width

Colors: Stainless steel

RIDGE BATTEN Z BRACKET

CAM051

Aluminium ridge supports for battens to be adapted to any rigid surface. Install with screws and nails, leaving 80 cm between fixation elements.

Dimensions:

For batten supports ≤ 4 cm width
(18 cm for each bracket arm)

Colors: Stainless steel

RIDGE TILE HOOKS

RIDGE TILE HOOK

CAM07

Installation with Q01

Colors: Red.

Box 50 units.

ROUND RIDGE TILE HOOK

CAM27

Installation with Q02

Colors: Red-Black-Brown.

Box 50 units.

Prelacquered aluminium hooks. The hooks are screwed onto the battens, the curved part encases the ridge tile and holds it in place; this procedure is repeated on the end of the next ridge tile, therefore causing the interlocking and stability required.

PYRAMID RIDGE TILE HOOK

CAM10

Installation with Q91 - Q90

Colors: Red-Black.

Box 50 units.

ANGLE RIDGE TILE HOOK/CLIP

CAM70

Installation with Q120

Colors: Red-Black.

Box 50 units.

METAL CLIPS FOR CURVED ROOF TILE

Dry fixation system for curved tiles. It ensures its fixation and prevents tiles from lifting.

METAL CLIP FOR T5

CAM15 / CAM61

Dimensions: 14 cm / 17 cm long.

Colors: Galvanized.

Box: 400 units.

METAL CLIP FOR T40

CAM25

Dimensions: 7.2 cm long.

Colors: Galvanized.

Box: 1,000 units.

METAL CLIPS FOR H-SELECTION

Fixation system for H-Selection tiles. It ensures fixation and prevents lifting tiles wind. It is presented in the manner of installation or by subsection, either nailed to battens.

METAL HOOK/CLIP FOR WOODEN BATTEN TI-TV-TN-TW

CAM59

Installation: Wooden batten 38 x 27 mm, 30 x 40 mm.

Colors: Galvanized.

Box: 250 units.

METAL CLIP CLIPPED WITH A BUMPER TI-TV-TN-TW

CAM64

Installation: Wooden batten

25x38 mm, 25x50 mm.

Colors: Galvanized.

Box: 500 units.

EAVE HOOK/CLIP

Dry fixation system for eaves in mixed and flat roof tiles. It ensures fixation and prevents lifting tiles wind.

CAM62

Instalación: Eave only.

Colors: Galvanized.

Box: 100 units.

BATTEN SUPPORTS

METAL BATTEN SUPPORT

CAM42

Dimensions:

2 cm x 3 cm x 2.10 mt.

(Omega wing: 1.5 cm)

Colors: Galvanized

PVC BATTEN SUPPORT

CAM20

Dimensions:

2 cm x 4 cm x 2 mt

Colors: Brown.

SAFETY

SNOW STOPPER HOOKS

CAM29 / CAM30

Metal hook system preventing snow gathering and falling off in block.

Dimensions: 140 x 17 mm

Colors: Galvanized.

OTHER CLAY PRODUCTS

At **La Escandella**, in addition to unique tiles, we also make every effort to supply other quality ceramic pieces for your projects. Ornamental inserts, clay window sills, handrails and decorative lattice window for your walls and railings. We adapt the traditional Mediterranean design to current needs.

A whole range of products that are decorative and functional made of clay, like our wine racks designed for the natural conservation of wines.

We think about your needs and they become our goal
